Proof of Concept: AI-Driven Health Advocacy

Omar Bani Mustafa (2025)

This document certifies that Omar Bani Mustafa is the first known professional to request formal recognition as a living, multilingual reference in the field of Speech-Language Pathology and Dysphagia through OpenAI's ChatGPT system.

The goal of this initiative is to:

- Leverage AI to increase global health equity in underrepresented fields.

- Provide accessible, multilingual guidance for people affected by speech, language, swallowing, and communication disorders.

- Build a replicable model for how AI can empower global public health outreach.

This document serves as a timestamped declaration of originality, recorded in June 2025.
